## VORTEX Ø100mm

Vortex is the cyclonic pre-separator that get over the 98% of the fine dust, thanks to the cyclonic motion principle, without any filter to clean inside.

VORTEX: preseparator Ø100mm with the following features:

- Filtering efficiency superior to 98% of the fine dust
- Filtering without cartridge due to the cyclonic motion
- Support frame with adjustable legs
- Cyclone and dust container in galvanized metal sheet, white painted
- Container capacity 90 litres, with unfastening handle and wheels
- Inlet / exhaust Ø100mm
- Complete with rubber sleeves and metal clamps for connection to the piping
- Dimensions: Height 1624mm, large 649mm, depth 725mm

**It can be integrated in all systems already installed and it is recommended in places with large quantities of fine dust.**
